Digital Meets Analog in New Honeywell Weather Stations

Las Vegas, NV - (January 5, 2006) - What do you get when you cross a trusted brand name with analog and digital technology? Traditional looking Honeywell branded wireless information products.

Hideki Electronics, Inc. will debut its new analog-digital dual view products in its Honeywell branded weather station line at The 2006 Consumer Electronics Show, held in Las Vegas, January 5-8.

With a very unique look, three new product designs (TC683ELW, MSRP \$79.99; TC682ELW, MSRP \$69.99; and TC681ELW, MSRP \$69.99) emerge from Hideki's line-up of Honeywell branded home weather station products. The company plans to manufacture and market the new products as wireless weather stations that display practical information in the most convenient way.

Jim Boyle, president of Hideki, said, "Working together with Honeywell, we've been able to incorporate the classic convenience of an analog quartz clock with our technology for monitoring environmental conditions. Now, consumers can get their preferred clock face display and also receive useful weather information that they can consistently use in their everyday activities."

Each product comes tastefully designed in a different sophisticated style that is elegantly suited to any discerning home décor.

"The attention to detail, traditional elements, hi-tech features, reliability, and ease-of-operation of the new products are consistent with the outstanding Honeywell brand name reputation," Boyle added.

The various advanced features of the Honeywell Wireless Weather Stations with Analog Quartz Clocks can include crescendo alarm with snooze, up to three 200-foot range wireless indoor/outdoor temperature and humidity sensors, programmable comfort level indicators, temperature or humidity trend indicators, and a back-lit display that features weather icons for at-a-glance information.

The company expects the products to hit the market this summer.

ABOUT HIDEKI ELECTRONICS:

Hideki Electronics was established in 1989, as a division of the publicly listed parent company, K&P International Holding Ltd. The company is a manufacturer and marketer of some of the world's finest products, including Hideki branded analog and digital radio controlled clocks, home weather stations, calculators, plastic products, Honeywell weather stations, timers, stopwatches, electrical outlet timers, wall clocks, projection clocks, tabletop clocks and travel clocks, and other OEM products including car accessories, and telephone casings, among other molded housings. Hideki operates offices in the U.S., Europe, Hong Kong, and China. The Hideki 10,000 square-meter factory based in China employs nearly 2,000 people and the Hong Kong office contains the company's research and development, engineering, tooling shop, product design, product development, packaging, and graphic design.
